

About us

Media offer

The university library is an academic library that places its focus on pedagogy and psychology. In addition, we stock a large selection of media on different study subjects. A total of over 230,000 printed and electronic books as well as approx. 12,000 electronic journals and approx. 6000 databases are available. The printed books, journals and other media (DVDs, audio CDs, CD-ROMS, games) are freely available and systematically organised according to subject.

As a central establishment we mainly provide members of the University of Education Karlsruhe with literature to support their studies, teaching and research. However, anyone with scientific and professional interests is welcome to use our services.

Current journals can be found in the reading room005160005300510245
